MESSAGE

Dear Colleagues,

On behalf of the International Society of Cardiovascular Ultrasound, I cordially invite you to attend and participate in the 3rd World Congress on Cardiac Imaging and Clinical Cardiology (WCCICC-2023) to be held October 6 - October 8, 2023 at the Hotel Grand Hyatt, Santacruz E, Mumbai, India. This Congress is co-sponsored by the International Society of Cardiovascular Ultrasound (ISCU) and other organizations. An excellent scientific program encompassing various aspects of interest to all practicing physicians, cardiologists, radiologists, surgeons, anesthesiologists and paramedical personnel has been planned under the capable leadership of Dr. G.N. Mahapatra, Executive President and Dr. C.N. Manjunath, the National President of the Congress, both of whom are pioneers in the field and nationally renowned cardiologists. The scientific program will include invited lectures, seminars, debates, interesting case studies as well as presentations of oral abstracts and scientific posters from several cardiovascular centers throughout the world.

Faculty from all over the world have been invited to this World Congress to share their experiences in all fields of cardiac imaging and clinical cardiology and this will contribute to the exchange of scientific information among all attendees.

The major aim of the International Society of Cardiovascular Ultrasound is to promote an exchange of ideas and information amongst members of various countries, advance the science and art of cardiovascular ultrasound and other allied techniques including radionuclide imaging, magnetic resonance imaging, CT imaging and intracoronary and intravascular imaging, and encourage and further the knowledge of these subjects. The Society serves to disseminate in a rapid manner recent advances and developments in the field by sponsoring or cosponsoring educational and scientific meetings including World Congresses in various parts of the world. The Society publishes in the Echocardiography Journal news and other items of interest to its members and promotes its aims and objectives as well as through their website: www.iscu.org.

We look forward to the pleasure of meeting you in the beautiful city of Mumbai in October, 2023.

Sincerely,

Dr. Navin C. Nanda

MD, DSc (Hon), DSc (Med) (Hon), FACC, FAHA, FISCU(D)

MESSAGE

Dear Colleagues,

Under dynamic leadership of Dr. G.N.Mahapatra, the WCCICC 2023 is being organised at Mumbai from 6th to 8th October 2023. This meeting will provide the Academic platform for both Cardiologists and Cardiothoracic and Vascular Surgeons including Nurses and Technologists to update their knowledge amidst explosion of technological advances.

Cardiac Imaging has virtually revolutionised our understanding of Coronary, Congenital and Structural Heart Diseases, contributing a lot in decision making process regarding treatment strategies and outcomes.

The conference will bring together scientists and specialists from India and abroad who will exchange their valuable views in this era of evidence based on Clinical Cardiology and Cardiac Imaging and also provide a greater opportunity to understand each other's culture, social behaviour and to make long lasting friendship with an ultimate objective of achieving quality care and better outcomes.

It is very essential and imperative to understand both the basics and emerging technologies so that patients at large will be benefitted. This sort of meeting will also stimulate more Research, Trials and also to understand each other what is happening in the rest of the world.

I wish this Conference a great success and also will have wonderful social experience.

**“Decision Making is more important than
Interventions and Incisions”**
“Treatment should not be harmful than the Disease”
“Understanding is deeper than the Knowledge”

MESSAGE

Dear Esteemed Colleagues/ Friends,

On behalf of the members of the organizing committee as well as the scientific committee, I extend my cordial invitation once again to you all at 3rd world congress on cardiac imaging and clinical cardiology(WCCICC-2023) here in the vibrant city, Mumbai from 6th -8th October 2023 at hotel Grand Hyatt, Santacruz (E).

The WCCICC-2023 has a very rich agenda covering all aspects of Cardiovascular disease such as Cardio-diabetes, Cardio-lipids, Hypertensive heart disease, Acute and chronic ischaemic syndrome, Heart failure with preserved EF and reduced EF (HFpEF and HFrEF), Valvular heart disease, Cardiac devices, high risk angioplasty, CABG including Cardiac transplantation, Preventive cardiology and various imaging modalities (CT,MRI, Echo-cardiography, Nuclear & PET, Intravascular imaging such as IVUF, OCT, FFR and NIRS), state of the art lectures, symposia, debates, plenary session, controversies. There will be live workshops on cardio-respiratory support and ECG interpretation. There will be also arrangement for certification course program for PG students and young faculties. Our 3rd text book of Cardiac Imaging Update-2023 will also be released and distributed to all participants and necessary credit points has been arranged from Maharashtra Medical Council (MMC) for all delegates. There are over 40 international eminent speakers will be interacting in various fields of cardiology to their counterpart to arrive at a common consensus to deliver the optimum line of diagnosis and treatment for our cardiac patients.

Besides these extensive scientific interactions, I am sure every participant would certainly experience the nice blend of fun, entertainment, fine dining including genuine and skill full knowledge during these 2½ days.

The success of any large sized meeting like this depends on early confirmation of participation. Hence I take the liberty of requesting you all to register early by clicking the appropriate link mentioned in the website:<http://wccicc2023.com/> to have early discounted registration fee. The theme of this congress is **“Enhancing Clinical Potentials in Cardiology by Advances in imaging”** focusing optical diagnostic and treatment planning in day to day cardiac practice.

I on behalf of the members of organizing committee assure you all that memories of this important attendance of yours here at Mumbai will be a memorable event forever.

MESSAGE

Dear Friends,

WCCICC once again will strive toward an ecumenical approach to imaging, promoting cooperation between the now distinct, often competing and parochially biased imaging disciplines. This world class congress once again will activity seek to change the thinking from imaging as destinations to imaging as patient care enhancer. It will serve as a soap box to encourage the development of an integrated cardiovascular imaging subspecialty.

So friends, on behalf of the scientific committee I can assure you all to have an exciting scientific feast during these 2 and ½ days unique congress in Mumbai.

Dear Colleagues,

The 3rd World Congress on Cardiac Imaging and Clinical Cardiology, being held in Mumbai on October 6-8, 2023, is clearly going to be a “must attend” event – all of us missed high quality educational meetings during the COVID-19 years and this excellent conference will easily compensate for that.

The scientific committee has come up with a unique program – addressing a combination of cutting-edge topics, state of the art lectures as well as a wide coverage of practical aspects that will help you optimize your clinical practice and improve patient care strategies.

I would strongly encourage all of you to avail this wonderful opportunity for learning, clinical practice improvement and networking. I look forward to seeing all of you there.

Best Wishes

MESSAGE

Dear Esteemed Colleagues,

Mumbai will glow again with the third world congress on cardiac imaging and clinical cardiology w.e.f. 06th - 08th October 2023. The WCCICC-2023 promises to be a unique academic extravaganza.

Medical science is a rapidly advancing field and yesterday's facts may become matter for the archives to store and today's facts may not find agreement with experts of tomorrow. Continuing medical education is therefore an integral part of medical profession.

The conference will cover diverse aspects of cardiology with current and futuristic approaches. Panel discussions, debates, interactive sessions, quiz and hot topics in various fields are scintillating attractions of the conference. The featured faculties are leaders in their own field with national and international repute and the format will allow considerable interaction with the faculty. I am sure the scientific programme will attract the medical fraternity from diverse fields.

A galaxy of speakers from different parts of the globe will be addressing on current issues in cardiac imaging and clinical cardiology. I am sure the delegates will enjoy the flashes of their expertise during their discourse.

On behalf of scientific committee, I have great pleasure in inviting you to actively participate in this conference.

The recent technological advances has no doubt greatly facilitated the delineation of various diseases and also reduced the risk during interventions but most of these procedures are costly and beyond the reach of a common man. Attention should therefore be paid on economics of treatment also so that health care does not remain the preserve of few and fruits of research are distributed to those who need it the most irrespective of their financial status.

Mumbai, the commercial capital of India and heart of the Bollywood film industry awaits for your gracious presence.

I am sure the deliberations of the conference will contribute towards better patient care.

MESSAGE

Dear participants and colleagues of WCCICC

I consider it as a great privilege and honour to be contributing in the intervention field of this meeting.

As one knows PCI has evolved tremendously in the last few years. Technological advances in the past several years have allowed us to help a wider range of patients with complex cardiac and coronary anatomy.

The evolving techniques and high quality stents have given strong long term results and especially the elderly patients are very happy to avoid knife and a stitch.

Different techniques for coronary bifurcation as well as stenting have evolved giving a good and strong result. The progressive techniques have confirmed long term benefits and are thus very beneficial, competing with surgical results.

We are now able to treat more complex coronary anatomy through novel devices as well as advanced imaging, and we are also able to intervene upon valvular disease in patients who have more comorbidities than prior. These advances in interventional cardiology will continue to shape our practice in the years to come, and their widespread availability to ailing patients will be of utmost importance.

I believe that scientific and educational conferences with the exchange of opinions of specialists from different countries are positively reflected in the accumulation of experience in the fight against cardiovascular diseases.

I call upon my colleagues to actively participate in the work of the WCCICC 2023 which is being held in Mumbai on the 6, 7, and 8th day of October 2023.

I am sure you will find the discussions interesting and useful in your practice.

We look forward to welcoming you in Mumbai, for what promises to be an unforgettable conference. See you there!

Yours Sincerely

MESSAGE

Dear Colleagues,

It is an immense pleasure to invite you for a great academic meeting being organized by WCCICC group from 6th to 8th October, 2023 under the dynamic leadership of Dr. G. N. Mahapatra. This conference provides exemplary education for interventional cardiologists, general cardiologists, cardiothoracic and vascular surgeons, nurses and technologists, scientists working in the field of cardiology. Apart from cardiac imaging this meeting focuses on other fields of cardiology, including interventional cardiology, clinical and preventive cardiology and non-invasive imaging.

Technological advances in the past several years have allowed us to help a wider range of patients with complex cardiac and coronary anatomy.

This conference makes various specialists and scientists from India and abroad to exchange their valuable ideas in cardiac imaging and clinical cardiology, and also long lasting friendship. The conference includes sessions on new clinical trial data, evidence based research and most up-to-date techniques that can be used in day to day clinical and practices.

So please do block your dates: 6th to 8th October, 2023.

Venue:- Grand The organizing committee making all efforts for your comfortable stay at Mumbai.

I wish you will have a wonderful and memorable experience.

Dr. P.C. Rath

President elect, CSI 2023

Dear Colleagues,

With Immense pleasure, I wish to congratulate Prof. G. N. Mahapatra for organizing this third edition of World Congress in Cardiac Imaging and Clinical Cardiology in a magnificent manner. This provides perhaps the largest inclusive platform, where in, eminent teachers, researchers, thinkers and practitioners of Cardiac Imaging and Clinical Cardiology from all over the world share their immense knowledge and wisdom for the betterment of humanity. Prof. G. N. Mahapatra has been, almost single handedly conducting all the World Congresses in Cardiac Imaging and Clinical Cardiology in Mumbai very successfully till date. This edition will also provide enough inspiration for the next generation to learn directly from these global experts, sharpen their skills as well as harden their determination.

The scientific content of this academic event is sublime. It covers several concepts and updates in this field for debating and challenging with the spirit of science and progress in our minds. A comprehensive textbook shall be released to facilitate us take such debates back to our homes and scrutinize at leisure, some of these abstractions. We can only refine our understanding and savour the knowledge as it unfolds in front of us over time, only through such academic exercises, which Prof G. N. Mahapatra provides us every alternate year.

I wish to convey my heartfelt wishes to every participant in this event to have a successful conference.

MESSAGE

Dear Colleagues,

The WCCICC 2023 is being organized in Mumbai from 6th to 8th October, 2023 under the leadership of Dr. G. N. Mahapatra. The congress though centered on Cardiac imaging is going to amalgamate cardio-thoracic surgery, clinical and preventive cardiology, cardio diabetes and non-invasive imaging to appeal to broad segment of our colleagues from various Specialties. This will be our third world congress under the banner of WCCICC in the field of cardio-diabetes arena.

We are planning a comprehensive scientific programme by noted experts in their field of excellence. The programme would have didactic presentations, certificate course programme, lectures and workshops from masters in their field. It will be truly a "learning" experience. To quote Benjamin Franklin:- Tell me and I forget, Teach me and I may remember, Involve me and I learn.

The organizers and our event partners are meticulously planning it to the last detail to make your stay in Mumbai comfortable and rewarding. Do block your dates - 6th 8th October, 2023. Venue:- Grand Hyatt, Santacruz (E) Mumbai.
